

Flush plates
2013

Elegant and beautiful

NEW! FLAT FLUSH PLATES.

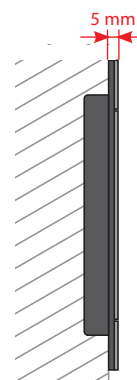

Full compatibility

FLAT flush plates are fully compatible with all our ALCA pre-wall installation systems. Installation is very simple and quick. It is also very easy to exchange previously installed, older flush plates for the new FLAT range. FLAT flush plates are very sophisticated and in keeping with modern trends in design and technology.

Only 5mm thick

The frame and the mechanism of the FLAT flush plates are fully recessed into the wall, so that the unit extends only 5 mm beyond the adjacent tiles. The visible surface is made of a 2 mm thick plate of brushed metal. The Flush plate therefore gives the bathroom a compact and elegant look.

PERFECT
WORKMANSHIP

FINGERPRINT-
PROOF FINISH

Alca®

Perfect workmanship

All parts are manufactured and processed using the most up-to-date techniques. Metal parts are cut by laser so that they fit perfectly together. The production process is continuously monitored and parts subject to stress are regularly tested in a modern laboratory. Flawless functioning has been demonstrated by laboratory tests using a minimum of 50,000 flush cycles. The whole production process is also subject to quality control procedures in accordance with ISO 9001:2008 and has been certified by the "Det Norske Veritas" organization.

Fingerprint-proof finish

The FLAT flush plate surface is treated with a special protective layer which does not show fingerprints. This reduces the need for it to be cleaned and wiped so frequently and thus greatly prolongs its life.

The visible parts are made of a material highly resistant to abrasion and UV radiation.

Barbora Škorpilová
Architect, designer and the creator of FLAT flush plates and M1370–M1375, M370–M475 for The ALCAPLAST company, Barbora is today known for her association with the MIMOLIMIT studio which she founded in 2001. The company specializes in interior design for both public and private buildings, in addition to standard architectural services.

FLAT Flush plates

Elegant and beautiful is how we can characterize the new FLAT range, which were designed for the most demanding of customers. They meet the demands of modern interior design by their original and clean lines which match the other elements in the bathroom.

The technical details are also novel. The mechanism is fully recessed into the wall, so the flush plate effectively merges with the surrounding tiles. The plate itself is made of brushed metal, on which fingerprints are not visible.

Furthermore, the FLAT flush plates are fully compatible with all our ALCA pre-wall installation systems.

SPECIFICATIONS

Dimensions (w × h × d)	247 × 165 × 5 mm
Material	Metal matt/polish
Flushing mechanism	dual
Flushing volume – WC Module	2–3,5 l / 6–9 l
